

Alfa Laval SaniMidget

Rotary Spray Head

Introduction

The Alfa Laval SaniMidget is a rotary spray head tank cleaning machine for hygienic environments. Designed to clean tanks from 1 - 10 m³.

The Alfa Laval SaniMidget minimizes the consumption of water and cleaning media. Easy to customize to meet customer requirements, the SaniMidget allows companies to spend less time cleaning and more time producing.

Application

The Alfa Laval SaniMidget is designed for the removal of residues from hygienic tanks across the dairy, brewery, distillery, beverage, food, IBC (intermediate bulk container), personal care and many other industries.

Benefits

- 40% faster cleaning = more time for production
- Saves up to 40% of your cleaning cost
- Dynamic cleaning performance and 360° full wetting
- Easy to retrofit traditional spray balls to a more economical solution

Standard design

Different choice of spray pattern suitable for various applications and tank designs, ranging from simple tanks to more complex tanks with structure such as agitator and baffles. The SaniMidget is lubricated by the cleaning media.

Working principle

The flow of the cleaning media causes the head of the Alfa Laval SaniMidget to rotate, and the fan-shaped jets layout a swirling pattern throughout the tank or reactor. This generates the wetting/impact needed for the efficient removal of the residual product; the cascading flow covers all internal surfaces of the vessel.

- Clip-on: 1" ISO 2037, or DN25 DIN11850-R1 or R2, or 1" BPE US

Caution

Avoid hydraulic shock, hard and abrasive particles in the cleaning liquid, as this can cause increased wear and/or damage of internal mechanisms. In general, a filter in the supply line is recommended. Do not use for gas evacuation or air dispersion. For steaming we refer to the manual.
